

Eclipse Series

Solar Powered, A / C Barricade Light

Near indestructible construction and over 5 year battery life.

C&C Signal's Eclipse Series Solar Powered A / C Light was designed to say good-bye to battery changes.

Our patent pending case and circuitry features provide the first solar barricade light designed to meet the rigors of rental conditions.

Our batteries do not require regular replacement. These lights have the ability to operate without maintenance for 3 to 5 years. They can run 1 to 2 weeks with no sun (depending on location and type of light). During a complete discharge, the light will recharge in 1 to 2 hours. Meets I.T.E. specifications and is NCHRP-350 approved, and is made in the USA.

3-Way Operation: Steady On, Flashing or Off
Advanced Circuitry, Case, Lens and LED

Length of Operation: 3 to 5 years

Battery: LiFeP04
